

The Faculty of:	Electrical and Computer Engineering
Field of study:	Computer Science
Speciality:	
Study degree (BSc, MSc):	MSc

COURSE UNIT DESCRIPTION

Course title:	Multimedia
Lecturer responsible for course: Dr. Bogdan Kwolek	
Contacts: phone: 1592	e-mail: bkwolek@prz-rzeszow.pl
Department : Department of Electrical Engineering and Informatics	

Semester	Weekly load	Type of classes				Number of ECTS credits
		L Lectures	C Theoretical Classes	Lb Laboratory	P Project	
3		25		25		3

Course description
<p>Lecture: Color space: RGB, YSI, YCbCr, YUV. TV standards: PAL, NTSC. Compression: Huffman, quantization, DCT, JPEG, MPEG-2, MPEG4, MPEG-7, H.263/H.264. Image retrieval, multimedia databases, video indexing: image segmentation, video retrieval. Human-Computer-Interaction. People detection, face detection, face recognition, face tracking, head tracking, head pose estimation, human-machine-interaction. Videoconference systems. Face detection in teleconference systems, transmission of voice and video, video repositories. RTP protocol. Technologies of tele-learning, tele-medicine. Technology on-demand, video on-demand. The usage of Windows and its components in multimedia: DirectX, Vfw, MCI. Java Media Framework, Java Advanced Imaging, Java 2D, Java3D, Java Sound.</p>
<p>Classes:</p>
<p>Laboratory: Java Media Framework</p>
<p>Project:</p>

Objectives of the course

The objective of the Multimedia course is to prepare students to be a part of teams that specify, design, build, implement, manage and use multimedia systems as well program multimedia applications. To accomplish this objective, students must understand how to use multimedia technology, including hardware, software, and communication, compression as basic components of multimedia systems. This understanding is based on a theoretical grounding as well as on experience working both individually and in teams to program multimedia applications.

Examination method

Test.
